

SMART-E Work Package 2 Technical Training Reconfigurable and logistics robotics

14-16 September 2015
University of Salford

This workshop will bring together the researchers in SMART-E WP2 to learn about developments in the field of reconfigurable and logistics robotics, to consider how to apply their research in industrial contexts, and to identify opportunities for synergies between projects and collaboration between researchers.

AGENDA

Part I: Monday 14 September

- 12.45 Welcome / Introduction *Samia Nefti-Meziani, University of Salford*
- 13.00 Stochastic modelling for degradation, lifetime prognosis and maintenance planning
Antoine Grall, Université de Technologie, Troyes
- 14.00 ESR scientific presentations (30 minute presentation, 15 minute discussion/feedback)
- Stefania Russo
Alex Bousaid
Mateo Leco
Roy Assaf
- 15.30 Work Package 2 roundtable
Synergies between projects
Opportunities for collaboration
Feedback/support for upcoming research outputs
- 16.30 Close

Part II: Wednesday 16 September

- Visit to Hellermann Tyton
- Site visit
- Identifying solutions to specific industrial challenges
- ESR reports on technical solutions

Part III will take place on 15 October at the University of Sheffield
